In-House Label Printing

uPrint-its are formatted to be printed on a laser printer on 8 1/2" x 11" label stock or by a thermal transfer printer on 4" x 6" or 4" x 2" label stock.

Ink jet printers are not recommended because they do not print labels durable enough for the Department of Defense.

By Laser Printer

Military Shipping Labels and Exterior Container Labels are printed two 4" x 6" labels per sheet. For MSLs and ECLs we recommend the following label stock:
- ★ Avery Presta 94278 - two 4" x 6" labels per sheet
- ★ Avery 94268 - 8 1/2" x 11" full sheet label
- ★ Avery 94269 - 8 1/2" x 11" full sheet label with a back slit

Unit and Intermediate Container Labels are formatted either 10 labels per sheet or 18 labels per sheet. We recommend the following label stock:
- ★ Avery 5163 or 5263 - 8 1/2" x 11" sheet with ten 2" x 4" labels
- ★ Avery Presta 94227 - 8 1/2" x 11" sheet with eighteen 1-1/4" x 2-3/8" labels
- ★ ULINE S-21845 - 8 1/2" x 11" sheet with eighteen 1-1/4" x 2-3/8" labels

By Thermal Transfer Printer

uPrint-its for 4" x 6" Military Shipping Labels and Exterior Container Labels and can be formatted to be printed on your own thermal transfer printer.

Unit and Intermediate Container Labels can be made as 4" x 2" uPrint-its.

To order for thermal transfer printer formats, make a note in the "Instructions for Us" section at the bottom of the order form telling us that you need the 4" x 6" thermal printer format.
